

## ABOUT JOTUN POWDER COATINGS

As one of the leading powder coating companies in the world today, with 11 powder factories worldwide, we **understand** the need for finishing options that are **both** beautiful and environmentally responsible.

We understand the expectations and challenges of these markets and know that our solutions need to cater to the combination of both aesthetics and functionality. Our products and solutions are specifically designed to be decorative, yet provide maximum protection.

## BENEFITS OF JOTUN POWDER COATINGS

### UNPARALLELED DURABILITY

Powder coating provides businesses, consumers, and industries with an economical and durable finish that's more resistant against scratches, chipping, wear, and fading compared to other types of finishes. With Jotun, there is the added advantage of an unlimited selection of long-lasting colours and textures – be it smooth, to complement flawless finishes or rough textures to hide surface imperfections.

### CARING FOR THE ENVIRONMENT

Powder coating is better on the environment compared to regular paints that may contain pollutants such as volatile organic compounds (VOCs). Powder coating does not contain solvents, and only releases negligible amounts of VOCs, if any. This benefit also helps save expenses on equipment needed to control or manage pollutants.

### LONG TERM COST SAVINGS

Jotun powder coatings are formulated to save you time and costs while ensuring better powder utilisation. Our coatings help improve operational efficiency by optimising surface mileage without compromising quality, thus assuring you long term cost savings.

## OUR PRODUCTS:

Guard Miles+	Guard Endure	Guard Style
<ul style="list-style-type: none"> <li>• High mileage and good appearance</li> <li>• Better powder <b>utilisation</b></li> <li>• Energy savings and productivity gain</li> </ul>	<ul style="list-style-type: none"> <li>• Enhanced scratch, mar and abrasion resistance</li> <li>• Durable and long lasting appearance</li> <li>• Optimal protection</li> </ul>	<ul style="list-style-type: none"> <li>• Superior appearance and colour consistency</li> <li>• Wide range of <b>colours</b> and <b>glosses</b></li> <li>• Good corrosion and chemical resistance</li> </ul>

Our product is available in smooth, texture and metallic finish.
